

XM is the best thing to happen to the average radio listener since the advent of FM back in the 60's. we benefit from the multiple choices and channels, a variety not found on regular radio. having weather and traffic only brings further value to the service, which i value and cannot live without. please reject the NAB's petition 04-160, and let XM radio grow and fruition without silly petitions like this restricting XM in a harmful and illegitimate way. thanks,

Sean McCarthy
